

Suyash Bhavalkar

👋 Hi there!

I'm Suyash, a passionate developer crafting beautiful digital experiences. I specialize in building modern web applications with clean code and thoughtful user interfaces!

About Me

- 🔭 I'm currently working on generative AI models and their real-world applications.
 - 👯 I'm looking to collaborate on open-source projects and innovative tech solutions.
 - 🤝 I'm looking for help with advanced algorithms and data structures.
 - 💻 I'm currently learning about cloud computing and DevOps.
 - 💬 Ask me about web development, AI/ML, and programming languages.
 - ⚡ Fun fact: I can code without coffee!

💡 Featured Projects

1. 🤖 Autonomous Generative AI Agent for Presentation Creation

Built an autonomous generative AI system that converts natural language prompts into professional PowerPoint presentations.

LangGraph FastAPI React Docker

2. 📄 RAG-based Legal & Policy Document Assistant

Developed an AI-powered document intelligence system for legal and policy PDFs using RAG.

LangChain FastAPI NLP Python

3. 🧠 MRI-Based Brain Tumor Classification

Designed a deep learning system for automated brain tumor detection from MRI scans.

TensorFlow Python FastAPI

4. 😴 Driver Drowsiness Detection System

Engineered a real-time computer vision system to detect driver fatigue using facial landmarks.

Python OpenCV FastAPI

5. 🔒 CryptoLock – Secure Text Encryption Platform

Developed a secure web-based encryption platform for protecting sensitive information.

FastAPI React Security Python
